## Two-Way Angle Valve 6875-LD-80CP

### INTRODUCTION:

YES Two-way Angle Valve is designed with simple Y shape and fashionable elements. The cylinder is combined with the ergonomic design concept. The handle and the body is designed by a 120-degree angle. The least material is used to achieve the best functional effect and the operation more user friendly.

YES Two-way Angle Valve design can simultaneously discharge water at two ends, allowing users to directly connect the washing machine + laundry tub, washing stand + garden water hose, or two washing machines at the same time. It doesn't require to install 2 faucets for the application.

### DESCRIPTION:

1. Anticorrosive surface treatment of copper products, easy to clean and maintain.
2. Material of forging body meets JIS 3771 standard.
3. Handle swivel range up to 90 degrees, which can control the water volume.
4. Connecting thread spec is G 1/2.
5. Brass with chrome-plated meets ASTM-SC2 standard; pass 96 hours Salt Spray Test.

unit: mm[inch]
